

Passionate and result-driven web-developer with a strong background in creating user-friendly, visually compelling, and user-centric web applications. Experienced in dynamic, team-based environments that value effective problem-solving, collaboration and creativity. Known for delivering scalable, responsive interfaces and design solutions that balance functionality with usability.

Work Experience

HTML/CSS Web Developer

February 2019 – March 2020

- Developed pixel-perfect landing pages and multi-page websites from Photoshop or Figma design files using HTML5, SCSS, Bootstrap, and jQuery.
- Ensured cross-browser compatibility and responsive design for desktop and mobile devices.
- Worked closely with designers and fellow web developers to deliver fully integrated solutions.
- Maintained and updated legacy codebases for small business clients.

Freelance Front-end Developer

June 2023 – June 2025

- Collaborated with clients to define UI requirements, project goals, and timelines.
- Built custom websites and SPAs using Angular, Angular Material, Firebase etc.
- Developed responsive UIs, reusable components, and optimized app performance.
- Applied best practices in Angular Signals, RxJS, and TypeScript for scalable codebases.
- Integrated third-party APIs and implemented basic CI/CD for production-ready delivery.

Independent Front-End Projects

Mar 2023 – Now
